

Covid-19 Updates for October 12, 2020

Dear Residents, Families, and Friends,

We have good news to share! As we explained last week, we made the decision to test all of our Independent Living (IL) residents in Greensburg, using the more reliable PCR test that takes a few days to get results. These test results are all now in and we have had no additional positive cases. We are grateful for these results, but know that we need to remain careful about all that we do to prevent the spread of Covid-19.

For all of our IL residents throughout our communities, please be conscious of symptoms of Covid-19 and do not hesitate to report your symptoms. If you have a temperature of over 100 degrees, a new or changed cough, or are experiencing shortness of breath or difficult breathing, immediately report these symptoms to your housing assistant or campus director. Please also notify your campus director or housing assistant if you have two or more of the following symptoms: repeated shaking with chills, headache, muscle pain, sore throat, chills, vomiting, diarrhea, new loss of taste, or new loss of smell. Remember, there is a receptionist/housing assistant on duty on each campus every day between 8 am and 8 pm.

If we continue to see no additional cases among our IL Greensburg residents, we will announce a date for reopening the dining room and other public spaces. Until then, please continue to protect one another by wearing your masks, maintaining your six foot distance, and wash your hands.

We'll be back in touch later in the week.

Sincerely,

Vicki
