

NO VISITOR POLICY

March 13, 2020

In order to protect our residents, we are instituting a NO VISITOR policy in our Nursing Home and Personal Care Homes for the next thirty days. This decision has not been made lightly, but on the best advice of the Center for Disease Control and our Medical Director. We know that limiting people coming through our doors is the best way to protect our residents. Should you have a family member who is near end of life or with other extenuating circumstances, please call your Campus Director about possible accommodations.

There are no formal restrictions on visitors to our Independent Living and Villa communities at this time, but we ask family and friends to use their best judgment and concern for our residents when considering visiting.

All those who enter our campus will be required to complete and pass a brief screening process and questionnaire.

We are taking added internal precautions, as recommended by the CDC to keep our residents and staff safe.

Thank you for partnering with us to keep our residents and staff safe!
